LDRA Competency Centre - Building skills for a safe and secure tomorrow

- **Launch of the LDRA Competency Centre (LCC), a new initiative provided to the Indian market**
- **LCC is an integral part of LDRA's Certification Ecosystem Development Program (CEDP)**

Bengaluru, India – 3 February 2016 - LDRA Technology Pvt. Ltd (a subsidiary of LDRA Ltd. UK), the leader in standards compliance, automated software verification, source code analysis and test tools, today launched their new initiative for the Indian market – the LDRA Competency Centre (LCC) at the IESA Vision Summit 2016.

The LDRA Competency Centre (LCC) was launched by LDRA founder, Dr. Michael Hennell. During his industry keynote session titled “Safe and Secure Designs for Global Markets Access – A Perspective to Make in India” at the IESA Vision Summit 2016, Dr. Hennell said, “Make in India is a great initiative by the Indian government, but getting international safety certifications is a major bottleneck for Indian products to enter developed markets. The lack of a local ecosystem and skill shortage are the major challenges that India faces when it comes to ‘Make for the World’. LCC is an initiative which addresses the current skill gap in the embedded industry in India and aims to help Indian companies achieve international safety standards.”

LCC is a world-class training facility for developing safety and security skills and it offers a one stop solution for building and maintaining a competent workforce for safety- and security-critical industries such as Aerospace, Defence, Nuclear, Automotive, Industrial, Medical, Rail, Security, etc.

Shinto Joseph, Operations and Sales Director, LDRA India, said, “LCC stands third in a series under LDRA's Certification Ecosystem Development Program (CEDP) that focuses on the overall development of the safety critical market. Addressing skill challenges at academic, industry and regulatory areas is one the major focus areas under CEDP. The first two initiatives under CEDP, i.e. LDRA Academic Alliance Program (LAAP) and Embedded Safety and Security Summit (ESSS) have been successfully supported by all stakeholders within the industry and we look forward to their continued patronage.”

###

About LDRA

For more than forty years, LDRA has developed and driven the market for software that automates code analysis and software testing for safety-, mission-, security-, and business-critical markets. Working with clients to achieve early error identification and full compliance with industry standards, LDRA traces requirements through static and dynamic analysis to unit testing and verification for a wide variety of hardware and software platforms. Boasting a worldwide presence, LDRA is headquartered in the United Kingdom with subsidiaries in the United States and India coupled with an extensive distributor network. For more information on the LDRA tool suite, please visit www.ldra.com.
