Automotive Functional Safety and Security Certification Scenario

Lack of Understanding of Compliance Objectives/ and Country-Specific Regulatory Guidelines Causes

- Overruns
- Project Delays leading to unhappy customers
- Not able to comply to standards not able to sell product in global markets
- Safety issues in the product call back liabilities/hazards
- Regulatory Standards
- Security Standards

Functional Safety Standards ISO 26262 and SAE J3061 Pose Multiple Challenges for Global Automotive Suppliers and OEMs

Integrated Approach Towards Certification

- Gap Analysis
- Skill Building
- Safety/Security Management and Practices
- Risk Assessment (Hazard and Threat Analysis)
- Product Development
- Qualified and Integrated Tools
- QMS
- Regulatory/Statutory Requirement Validation
- Compliance/Assessment
